[linkedin.com/in/developersabbir](https://www.linkedin.com/in/developersabbir)
github.com/developersabbir

Professional Summary: DevOps & Cloud Infrastructure Engineer with 4.5+ years of combined experience in software engineering, cloud infrastructure, automation, and technical leadership. Hands-on experience building containerized environments with Docker and Kubernetes, automating CI/CD pipelines with GitHub Actions and Jenkins, and managing AWS and Linux infrastructure. Strong background in backend engineering and distributed systems, with a focus on infrastructure reliability, production troubleshooting, monitoring, and scalable system architecture.

TECHNICAL SKILLS

CLOUD & INFRASTRUCTURE: AWS (EC2, ALB, S3, EKS, IAM, Route 53, Lambda, RDS, VPC, CloudWatch), Azure, GCP, Linux System Administration

CONTAINERS & ORCHESTRATION: Docker, Docker Compose, Kubernetes, Helm

IAC & CI/CD: Terraform, Ansible, Pulumi, GitHub Actions, Jenkins, GitLab CI, Argo CD

LANGUAGES & FRAMEWORKS: Go (Golang), TypeScript, JavaScript, Bash, SQL, Node.js, NestJS, Gin

PRACTICES & METHODOLOGY: Microservices, Distributed Systems, Monitoring, Observability, Troubleshooting, Security & Secrets

PROFESSIONAL EXPERIENCE

Softvance Agency | Mohakhali, Dhaka

Aug 2025 – Present

Capsule Leader / Lead Engineer | Mar 2026 – Present

Promoted through Backend Developer → Senior Backend Team Leader → Senior Project Lead → Capsule Leader

- Lead cross-functional engineering teams across backend, frontend, mobile, and UI/UX, managing end-to-end delivery from R&D to client handover.
- Design scalable backend systems and production architecture, including requirements analysis, development, integration, testing, and deployment.
- Architect and optimize cloud infrastructure and DevOps workflows using Docker, AWS (EC2, S3, EKS), Linux, GitHub Actions, and Jenkins, enabling CI/CD automation, zero-downtime releases, and improved system reliability through monitoring and logging.

Ashra Academy | Canada (Remote)

Apr 2024 – Dec 2024

Software Engineer (Full - Stack)

- Engineered microservices and **REST APIs in Node.js ecosystem** utilizing Git-based automated deployment workflows.
- Containerized multi-service ecosystem (web, API, mobile, browser extensions) using **Docker** for standard dev/prod environments.
- Optimized deployment automation scripts using **Bash & Linux system utilities** across environment tiers.

Wpwork, Inc. | Dhaka, Bangladesh

Feb 2022 – Oct 2023

Backend Developer

- Built scalable RESTful backend services using **Node.js, Express, NestJS**, and SQL databases.
- Integrated third-party authentication services, optimized complex database queries, and managed production debugging.
- Collaborated on server provisioning, **Nginx reverse proxy** setups, and SSL certificate maintenance.

INFRASTRUCTURE PROJECTS

terrorserver — HTTP Router & Proxy

github.com/developersabbir/terrorserver

Lightweight, high-throughput Go reverse proxy and router for low-latency request routing.

vpcm — Zero-Dependency VPS Manager

github.com/developersabbir/vpcm

CLI tool in Go to automate Linux VPS server provisioning, firewall management, and container execution.

EDUCATION

Diploma in Computer Engineering — Govt. Graphic Arts Institute, Dhaka (2021 – 2025 | CGPA: 3.19)

ACTIVITIES & LEADERSHIP

ST Sabbir (YouTube Channel): Content creator producing tutorials on backend development, programming, and DevOps tools (2021 – Present).
