github.com/developersabbir

Professional Summary: DevOps & Cloud Infrastructure Engineer with 4+ years of backend and infrastructure experience, currently working at Softvence Agency managing AWS, Docker, and Kubernetes environments, and building CI/CD pipelines with GitHub Actions and Jenkins. Hands-on experience with infrastructure reliability, production troubleshooting, and monitoring, with a background in backend engineering that gives me a solid understanding of what I'm deploying. Outside work, I run a YouTube channel on backend and DevOps tutorials.

TECHNICAL SKILLS

CLOUD & INFRASTRUCTURE: AWS (EC2, ALB, S3, EKS, Route53, Lambda, RDS, VPC, CloudWatch), Azure, GCP, Linux System Administration

CONTAINERS & ORCHESTRATION: Docker, Docker Compose, Kubernetes, Helm

IAC & CI/CD: Terraform, Ansible, GitHub Actions, Jenkins Server

LANGUAGES & FRAMEWORKS: Go (Golang), TypeScript, JavaScript, Bash, SQL, Node.js, NestJS, Gin

PRACTICES & METHODOLOGY: Monitoring, Observability, Troubleshooting, Microservices, Distributed Systems, Security & Secrets

PROFESSIONAL EXPERIENCE

Softvence Agency | Mohakhali Dhaka

Aug 2025 – Present

DevOps Engineer

- Designed and managed cloud infrastructure with AWS, Linux, Docker, Kubernetes, and Terraform, focusing on reliability & scalability.
- Built CI/CD pipelines and automation workflows to streamline software delivery, deployments, and infrastructure operations.
- Troubleshooting production and infrastructure issues while improving system reliability, observability, performance, and efficiency.

Ashra Academy | Canada (Remote)

Apr 2024 – Dec 2024

Software Engineer (Full - Stack)

- Engineered microservices and **REST APIs in Node.js ecosystem** utilizing Git-based automated deployment workflows.
- Containerized multi-service ecosystem (web, API, mobile, browser extensions) using **Docker** for standard dev/prod environments.
- Optimized deployment automation scripts using **Bash & Linux system utilities** across environment tiers.

Wpwork, Inc. | Dhaka, Bangladesh

Feb 2022 – Oct 2023

Backend Developer

- Built scalable RESTful backend services using **Node.js, Express, NestJS**, and SQL databases.
- Integrated third-party authentication services, optimized complex database queries, and managed production debugging.
- Collaborated on server provisioning, **Nginx reverse proxy** setups, and SSL certificate maintenance.

INFRASTRUCTURE PROJECTS

Terrorserver — HTTP Router & Proxy

github.com/developersabbir/terrorserver

Lightweight, high-throughput Go reverse proxy and router for low-latency request routing.

Breez — Local Tunneling Tools

github.com/developersabbir/breez

Breez is a Go tool that securely exposes local dev servers to the internet via WebSocket proxies.

EDUCATION

Diploma in Computer Science & Technology — Govt. Graphic Arts Institute, Dhaka (2021 – 2025 | CGPA: 3.19)

Secondary School Certificate — Ghior D. N. Pilot High School, Manikgonj (2019 – 2020 | GPA: 4.79)

ACTIVITIES

ST Sabbir (YouTube Channel) : Content creator producing tutorials on backend development, programming, and DevOps tools (2021 – Present)

REFERENCE

Senior Backend Engineer — Gotipath
